KEN ROBERTS

Chief Technology Officer, Unitek College of Nursing

Ken Roberts serves as Chief Technology Officer for Unitek College of Nursing, where he leads the organization's technology strategy and oversees the development of scalable digital and data platforms that support growth, student outcomes, and operational performance across a multi-campus environment.

Ken brings more than 18 years of experience leading technology and product organizations within private equity-backed SaaS companies. He has a proven track record of modernizing legacy systems, building cloud-based platforms, and driving large-scale transformation initiatives that improve efficiency, accelerate growth, and enhance the user experience.

Throughout his career, Ken has led the integration of more than a dozen acquisitions, scaled global engineering teams, and delivered measurable improvements in cost efficiency, delivery speed, and platform reliability. He is known for aligning technology closely with business priorities, ensuring systems and teams are built to support long-term value creation.

Prior to joining Unitek College of Nursing, Ken held executive technology and product leadership roles across high-growth organizations, where he led platform modernization efforts and supported companies through periods of rapid expansion, integration, and successful transactions.

At Unitek College of Nursing, Ken is focused on advancing a modern, scalable technology ecosystem that leverages cloud, data, and emerging technologies to improve access, strengthen outcomes, and support the future of healthcare education.
